

## About DMRC

DMRC is operated to provide children with the highest quality early learning environment possible. Our research-based Montessori program follows the guiding principles of the Association Montessori Internationale (AMI).

Our Mission is to nurture the curiosity and wonder that inspires learning so that children develop a deep understanding of the foundational skills essential to fulfilling their human potential.

## Montessori

With the guidance of our knowledgeable teachers and through interacting with Montessori materials children learn to care for themselves, others, and the environment while developing fine and gross motor abilities, social skills, language enrichment, emotional awareness and mathematical concepts.

Montessori Curriculum includes practical life, sensorial, language, mathematics, and culture studies. Our classrooms are carefully prepared with age appropriate montessori materials which are designed to give children hands-on experiences from which they learn. Children in these multi-age classrooms have long uninterrupted periods of work time where they direct own learning experiences based on their interests and their internal drive for mastery.

## Our Programs

### Toddler Classroom

In our joyful and loving Montessori toddler classroom curiosity, creativity and confidence are nurtured and the inner drive for understanding becomes a love of learning that will last a lifetime. Care of the self, care of the environment, gross and fine motor development, rich language development, mathematical concepts, social and emotional skills are all cultivated in the toddler classroom. Toddlers build independence and concentration through purposeful work. Social skills are built when children interact with peers, learning empathy, grace and courtesy while becoming able to identify and verbalize feelings and needs.

### Primary Classroom

Your child will receive a learning experience designed specifically to help them reach their full potential. Children will experience through self-directed, purposeful work, resulting in critical thinking skills, fine and gross motor abilities, social and emotional awareness, intellectual development, language enrichment and mathematical concepts all while they become increasingly independent. Children creatively and joyfully explore fine arts, music, dance, mindfulness, etc to discover the foundations of academic knowledge such as literacy, mathematics, science and cultural studies.
